Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1-8,18-20,21-24**, drawn to a transmitter with modulation and encoders, classified in class 375, subclass 295.
- II. **Claims 9-17,25-26,27-31**, drawn to a receiver with decoding and demodulation, classified in class 375, subclass 316.
- III. **Claims 32-35**, drawn to internals of a decoder, classified in class 714, subclass 792.

2. The inventions are distinct, each from the other because of the following reasons:

- a. Inventions I, II, III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are unrelated, wherein Group I is related to a transmitter with modulation and encoding, Group II is related to a receiver with demodulation and decoding and Group III is related to the internals of a decoder.
- b. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2611

A telephone call was made to Attorney Mark Pratt on 6/7/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
